Karl,

Our tools are intended to be used on our network, because they have several auto updating features built in. I have built this version to be used offsite.   First load your data in the "datastore" tab. Then, you will need to load standards (orange sections), Then you you will have to press the "assess this data" and it will do it's thing.

Feel free to cal if you have any questions.

Robert Hillegas
Physical Sciences Researcher / Scientist
